

Personalization

Personalizing an urn creates a meaningful and lasting memorial of a loved one. Eckels' advanced engraving department has several choices to aid you in accurately representing your loved one's memory and adding a personal touch.

Personalized Choices

Engraved Name and Dates

Standard name and dates can be engraved on most Eckels urns including hardwood, bronze, brass, marble and stainless steel. The urns that can be engraved are marked with a pen nib icon. Name and dates also come in many forms: Full name and full dates, or perhaps just name and years.

Standard Images

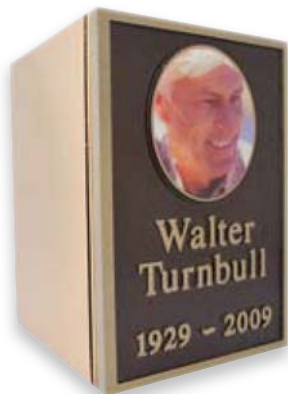

Eckels hosts over 1,000 standard images that can be engraved to add even more of a personal touch to reflect a person's true self whether it is their culture, interests, hobbies, affiliations or even accomplishments.

Custom Images

Custom images offer a visual element to your loved one's final resting place. Although all photos can be reproduced and engraved, several important criteria can assist you in choosing a picture that will offer the best result on your loved one's urn:

- Digital photographs should be high resolution
- Physical photos (printed pictures) are best scanned above 300 dpi
- Provide clear photos - the final outcome of the reproduced vector photo is entirely dependant on the photo's clarity

Brilliant Impressions

These urn faces are custom designed. Choose colour, background texture, border, and photo shape options. Plaques are made of composite metal, a process that gets maximum concentrations of bronze to the face of the plaque. The process requires casting, sanding, painting, belting, curing, and is finished with a durable clear coat.

Photo Medallions

Photo Medallions give families the option to display a beautiful photo of their loved one. The medallion can also be used to illustrate their involvement in any group or team. It is shown on the Bronze Chest Insert, however the medallion can be placed on most urns.

Urn Pendants

For those urns that cannot be personalized directly on the surface of the urn, such as the Cloisonné collection, the family may opt to have an urn pendant engraved to elegantly hang around the urn. Available in Bronze and Pewter, Oval and Frame pendants.

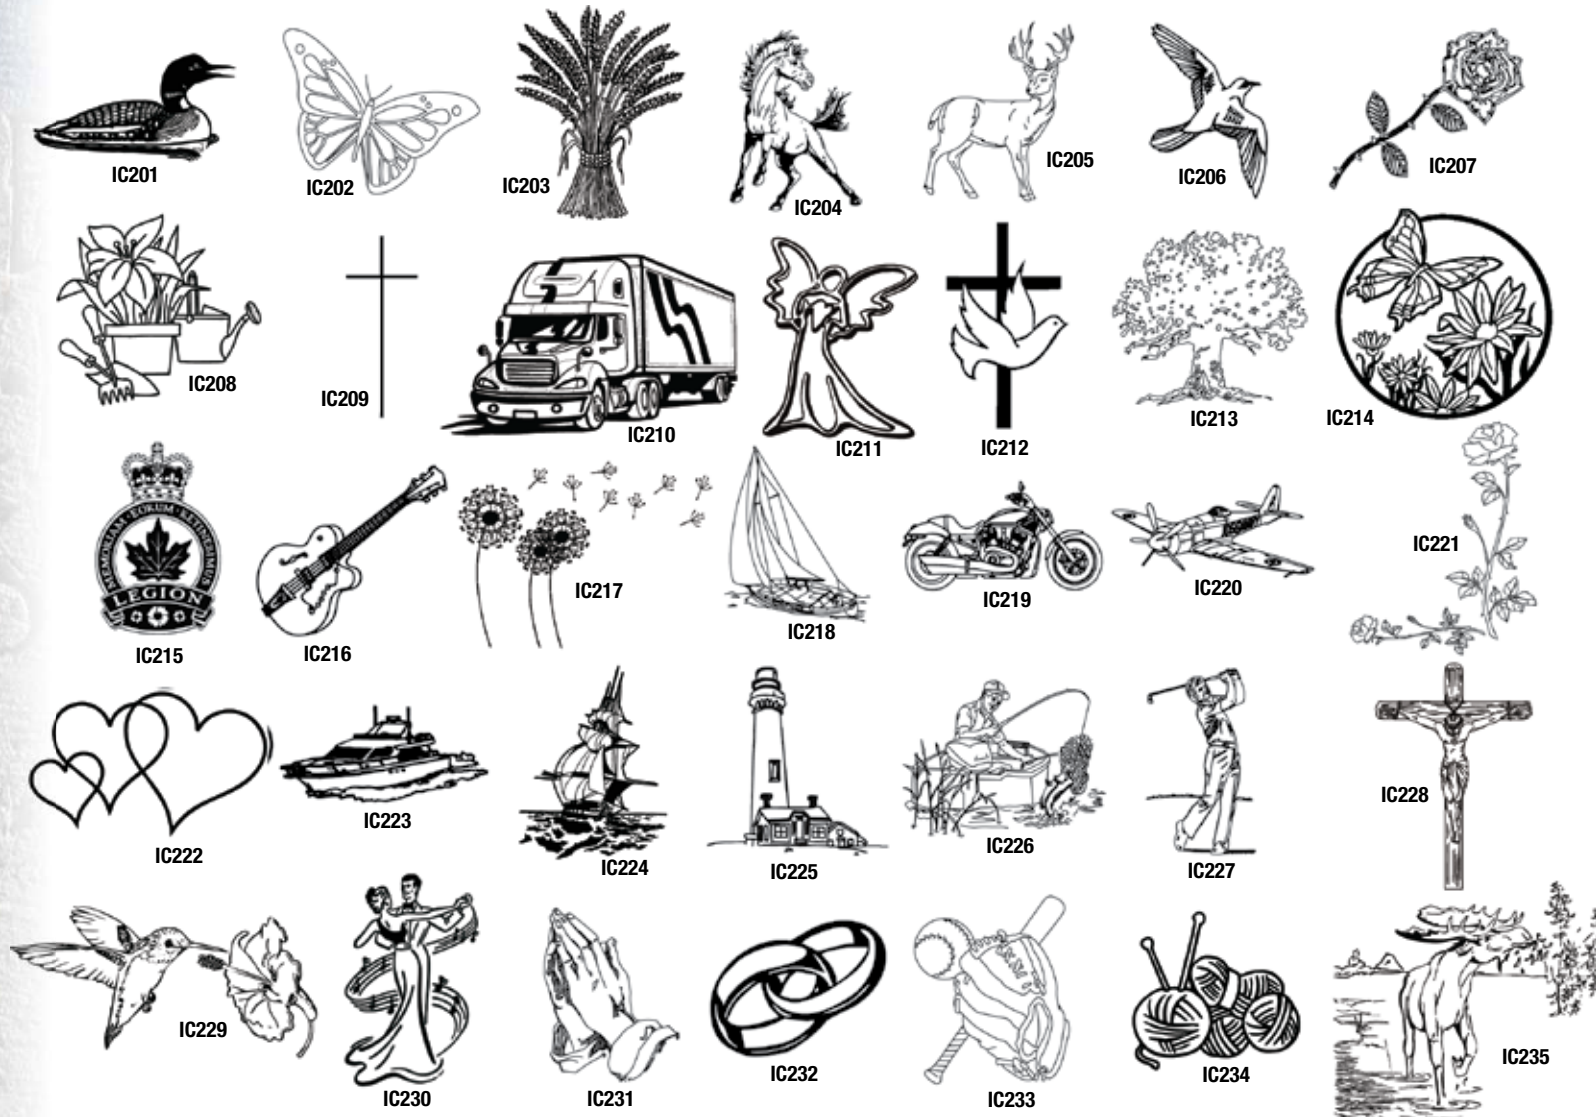

Appliques and Medallions

Bronze appliques and medallions can be selected to add a special touch to any flat surface urn including the most popular bronze and hardwood.

Personalization

Personalizing an urn creates a meaningful and lasting memorial of a loved one. Eckels advanced engraving department has several choices to aid you in accurately representing your loved one's memory and adding a personal touch.
